Alexey Kagan

Senior Fullstack Engineer

Tel Aviv, Israel · +972 53-931-07-07 · roscheka@gmail.com · linkedin.com/in/alexey-kagan · github.com/roschek · alex-kagan-develop.com

PROFILE

Senior engineer with over 9 years of expertise in designing and scaling complex, component-based applications using React and Vue. Proven leader in optimizing frontend architecture, achieving up to 40% improvements in performance. Adept at taking end-to-end ownership of features from technical design to production rollout, and experienced in modernizing legacy systems, including full codebase migrations to TypeScript. Passionate about mentoring teams and upholding high engineering standards to build exceptional user experiences in dynamic, product-focused environments.

EXPERIENCE

Full-stack Developer at Vi-soft 2026 – Present

Senior Full-stack Developer at Payouts.com, Tel Aviv, Israel 2023 – 2026

- → Spearheaded frontend architecture enhancements, resulting in a 40% acceleration in component loading times and significantly improving platform performance.
- → Engineered and executed a seamless migration of the entire frontend codebase to TypeScript, which reduced runtime issues by 25% and improved code maintainability.
- → Designed and implemented a modular Role-Based Access Control (RBAC) system from the ground up, strengthening application security and access control.
- → Mentored a team of 5 engineers, establishing rigorous code review processes and best practices that decreased production bugs by 30%.
- → Drove innovation by developing and integrating an AI agent for preliminary code reviews, cutting manual review time by 50% and boosting team productivity.

Senior Frontend Developer at Korus Consulting 2020 – 2023

- → Developed a high-conversion Vue 3 marketplace module for e-commerce giant LaModa, directly leading to a 15% increase in user conversion.
- → Optimized mobile UX and layout architecture, improving key performance metrics by 25% for a smoother user experience on all devices.
- → Architected and delivered a custom, real-time warehouse management system, enabling efficient data processing and operational oversight.
- → Built advanced, data-driven analytics dashboards using Vue 2+, Express, and MongoDB to provide critical business insights.

Full Stack Developer at Nota.Media 2018 – 2020

→ Engineered a scalable backend architecture using Nest.js and MongoDB to support a modern NFT marketplace with real-time transaction capabilities.

→ Owned the end-to-end delivery of multiple responsive web applications, tailoring each solution to meet specific client performance and UX objectives.

→ Collaborated with cross-functional teams to build and launch complex, feature-rich platforms for a diverse client base.

Frontend Developer at Yandex 2016 – 2018

→ Developed and maintained high-traffic, client-facing interfaces utilizing BEM methodology and a modular SCSS architecture for a highly scalable system.

→ Contributed to the development of internal tooling and core product features within a fast-paced, agile environment.

→ Actively participated in establishing high engineering standards through rigorous code reviews, test strategy contributions, and CI/CD automation.

SKILLS

Frontend: React, TypeScript, Vue.js, Angular, JavaScript (ES6+), HTML5, CSS3, SCSS/SASS, BEM

Backend: Node.js, Express, NestJS

Databases: MongoDB, SQL

Mobile: Flutter

Tools & Practices: Git, Docker, Webpack, NPM, Jest, React Testing Library, Cypress, Agile, Scrum, CI/CD, Component-Based Architecture

EDUCATION

B.Sc. in Computer Science — Saint Petersburg State University, Russia
